

# SAM CARTER

## QA / Software Testing Engineer

+91 91234 56789 • sam.carter@example.com • Bengaluru, Karnataka

### Summary

**QA / Software Testing Engineer with 2.4 years of experience** testing web apps by hand and with automation. I have worked with JIRA to do functional and regression testing, design test cases, and keep track of defects. Able to do automation testing with Python and Selenium WebDriver and has a basic understanding of frameworks like PyTest. Know how to test APIs with Postman and have a good grasp of the SDLC and STLC processes. Care a lot about making tests more efficient and delivering high-quality software in Agile settings.

#### Bright Wave Technologies Pvt. Ltd.

Bengaluru

Digital Insurance Platform Revamp

11/2023 – Present

Detail-oriented QA professional with strong knowledge of manual testing, including functional testing, test scenario design, and defect management. Familiar with SDLC, STLC, and Agile.

- Performed functional testing on modules such as Product Catalogue, Quote Engine, and Policy Management
- Designed and executed test cases and test scenarios based on business requirements
- Conducted regression testing after enhancements and bug fixes to ensure application stability
- Validated end-to-end user journeys including quote generation and policy purchase
- Identified, logged, and tracked defects using JIRA
- Performed re-testing and regression testing to verify bug fixes
- Created and maintained test cases and execution reports in TestRail
- Participated in Agile ceremonies including sprint planning, daily standups, and retrospectives
- Performed cross-browser testing to ensure application compatibility

### Projects

#### Restaurant POS & QR Ordering Platform

Domain: Restaurant Technology Domain

Role: Manual & Automation Test Engineer

Tools: Selenium WebDriver, Python, PyTest, SQL, Manual Testing, API Testing (Postman), JIRA

An all-in-one restaurant POS and QR menu platform enabling QR-based ordering, tableside billing, kitchen management, inventory tracking, and analytics for revenue optimization.

- Performed end-to-end manual testing of QR ordering, cart management, billing, payment processing, and kitchen workflows.
- Validated complete order lifecycle from menu selection to invoice generation and settlement.
- Tested financial calculations including tax, discounts, credit accounts, and reporting modules.
- Conducted functional, regression, smoke, integration, and UAT testing before production releases.
- Developed UI automation scripts using Selenium and Python for critical order and billing workflows.
- Automated regression scenarios to reduce manual testing effort.
- Performed REST API validation using Postman for order, billing, and analytics endpoints.
- Validated recommendation outputs for accuracy and business logic consistency.

- Logged and tracked defects using JIRA and collaborated with developers in an agile environment.

## Digital Insurance Platform Revamp

Domain: Insurance

Role: Manual Test Engineer

Tools: JIRA

This project focused on enhancing and modernizing an insurance platform that allows users to explore insurance products, generate quotes, and manage policies across different customer segments.

### Roles and Responsibilities:

- Performed functional testing on Product Catalogue, Quote Engine, and Policy Management modules
- Designed and executed test cases and test scenarios based on requirements
- Conducted regression testing to ensure stability after bug fixes and enhancements
- Validated end-to-end workflows such as quote generation and policy purchase
- Identified, logged, and tracked defects using JIRA
- Performed re-testing to verify bug fixes and ensure issue resolution
- Maintained test cases and execution reports in TestRail
- Performed cross-browser testing for application compatibility
- Participated in Agile activities like sprint planning and daily standups

## Skills

---

**Manual + Automation:** Manual Testing, Functional Testing, Regression Testing, Smoke Testing, UAT Testing, Selenium WebDriver, Basic UI Automation, Python Basic Automation Scripts, API Testing, Postman

**Testing Concepts:** SDLC, STLC, Test Case Design & Execution, Defect Lifecycle

**Test Management & Tools:** JIRA, TestRail, Zephyr

**CI/CD & Tools:** Azure DevOps, Jenkins, Git, Version Control

**Database:** SQL

**AI & GenAI Exposure:** Basic AI Feature Validation, Prompt Testing, Response Verification, GitHub Copilot, Test Scripting

**Domain Knowledge:** Restaurant POS and QR Menu Platforms, Online Ordering and Billing Systems, Inventory and Kitchen Workflow Management, SaaS Product-Based Applications

## Certifications

---

**Manual & Automation Testing** — Online Course Platform

Manual Testing and Automation course covering SDLC & STLC, bug life cycles, Selenium WebDriver, and Python automation framework design

**Web Application Test Automation (Python + Selenium)** — Online Course Platform

Hands-on training in UI automation, element locators (XPath, CSS), waits, reusable functions, and basic automation framework development.

## Education

---

**ABC University**

Bachelor of Science (B.Sc)

Pune,  
Maharashtra

06/2014 -  
08/2019

Nashik,  
Maharashtra

07/2015 -  
06/2017

**XYZ Institute of Computer Applications**

Post Graduate Diploma in Computer Applications
