QA Automation Engineer

ananya.sharma@example.com | +91 90000 00002 | Bengaluru, India | linkedin.com/in/ananyasharma

SUMMARY

QA Automation Engineer with 2 years of experience designing and maintaining automated test suites for web and API applications. Focused on reducing regression time and catching defects before release.

SKILLS

Selenium • Playwright • Java • Python • API Testing (Postman/RestAssured) • Jenkins • JIRA • Git

EXPERIENCE

QA Automation Engineer — ABC Technologies

Jan 2023 – Present

- Built and maintained a Selenium + Java automation suite covering 200+ regression test cases, cutting manual regression time from 3 days to 6 hours.
- Integrated automated tests into the Jenkins CI pipeline, catching an average of 8 defects per release before staging.
- Wrote API-level tests for 15+ endpoints using RestAssured, improving pre-release defect detection by 30%.

QA Intern — Brightline Software

Jun 2022 – Dec 2022

- Executed manual test cases for 3 sprint releases and logged 60+ defects with clear reproduction steps.

PROJECTS

E-commerce Checkout Automation Framework

Playwright, TypeScript, GitHub Actions

- Built a page-object-model framework covering the full checkout flow, running on every pull request.
- Reduced flaky test failures by 70% by introducing explicit waits and retry logic.

EDUCATION

B.E., Information Science

2018 – 2022

Visvesvaraya Technological University
